APPLICATION SETUP

1. Import Application

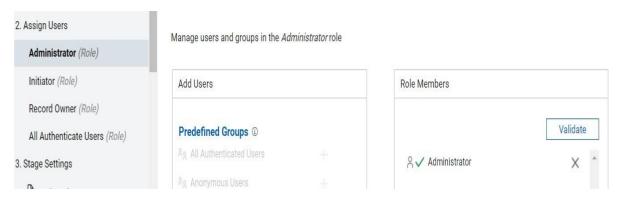

Import the application in your environment and uncheck the "Remove previously defined users and groups from this application" option to maintain the assigned roles.

Application Roles:

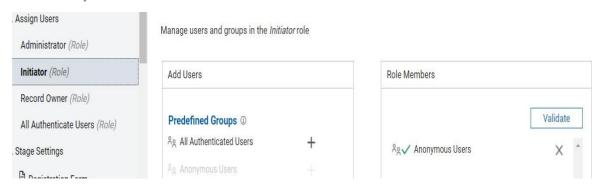

- User (Anonymous User)
- Administrator (Any Authenticated Domino User)

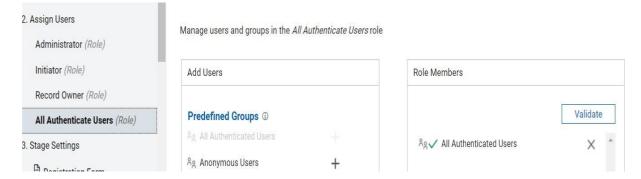

Here Domino Authenticated users must be added in Administrator role.

Here Anonymous users must be added in Initiator role.

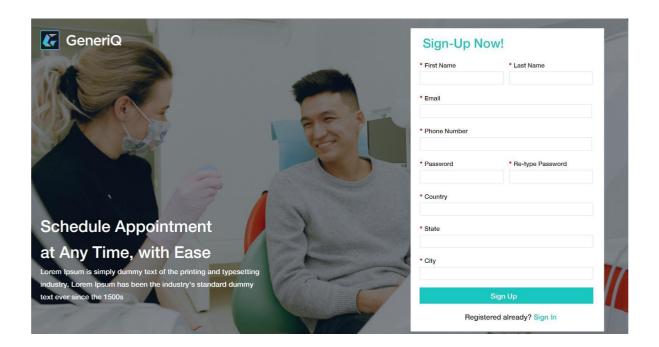

Create All Authenticated user role and add all authenticate users in that role.

APPLICATION DESIGN

- 1. User Registration Page
 - 1.1 Registration Page

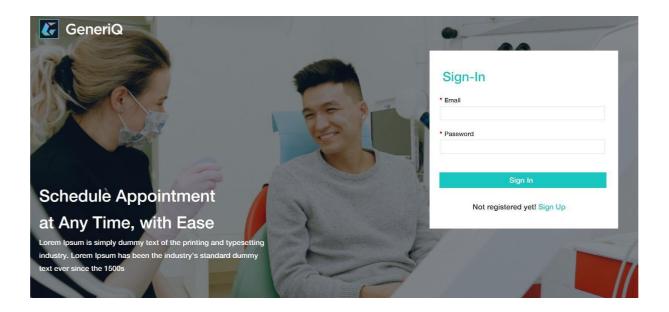

Here user first needs to register to book the doctor appointment.

2. User Login Page

2.1. Login Page

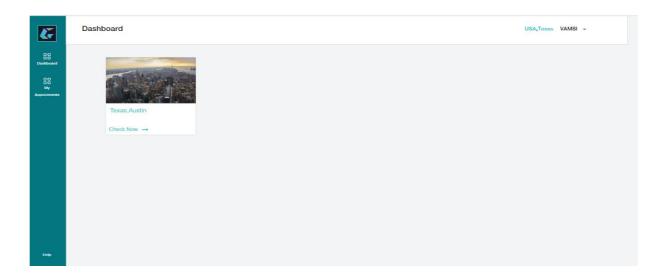

Here already registered users will use this page to login into the application to book the appointment.

3. User Landing Page

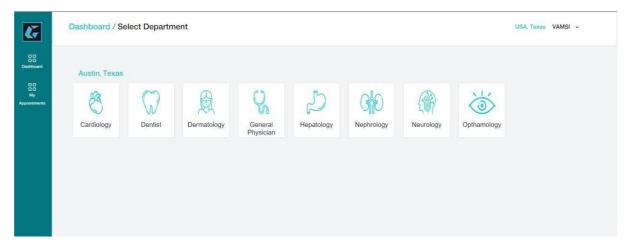

3.1. Dashboard

Here user can see location based on his/her registration details.

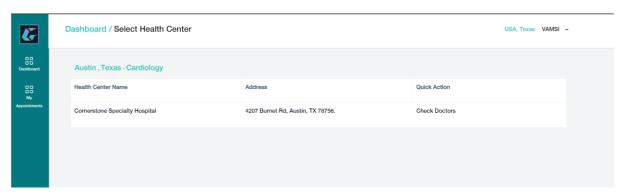

3.2. Departments

After selecting the location, user can select any one of the available department.

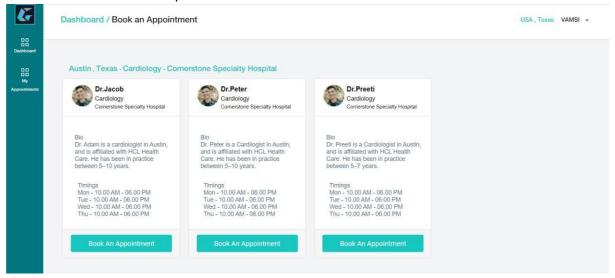

3.3. Health Centers

After selecting any one of the departments, user can select any one of the available health centers.

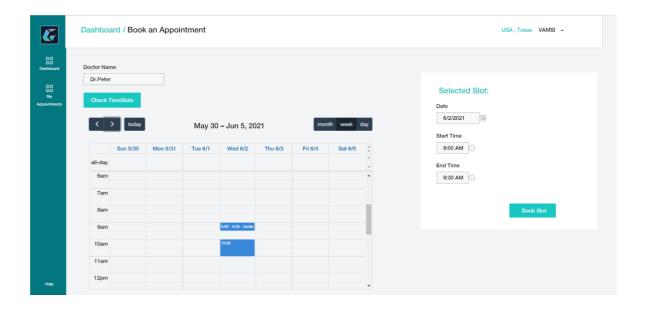

3.4. Doctors

After selecting any one of the health centers, user can select any one of the available doctors in the selected department.

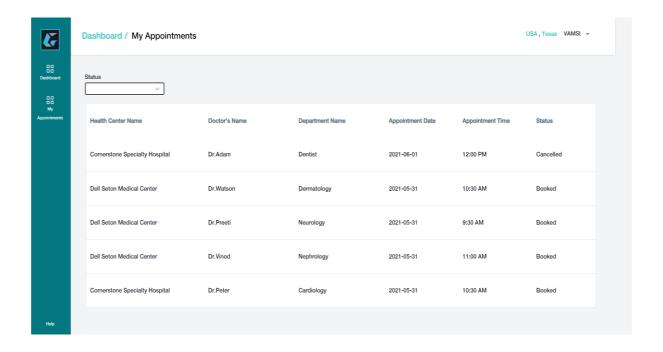

3.5. Appointment Page

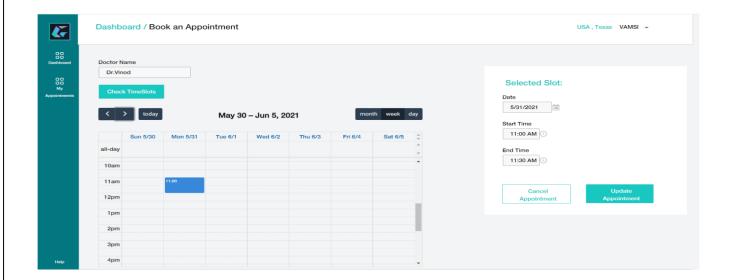

After selecting any one of the doctors, user will redirect to this appointment page, here user can book the appointment after selecting the date and the available time slot in calendar.

3.6. My Appointments

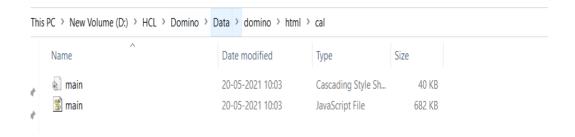

Here user can see the list of booked and cancelled appointments. By selecting the records in the table, user can cancel or update the booked appointments.

3.7. Cal File

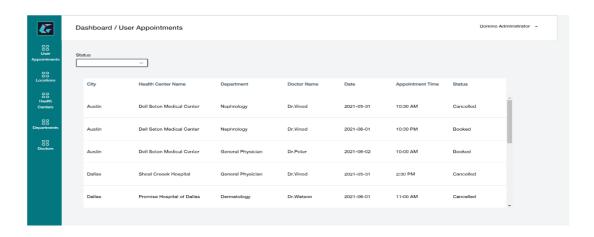

For the calendar view this "CAL File" we have to place in domino server path.

Administrator Landing Page

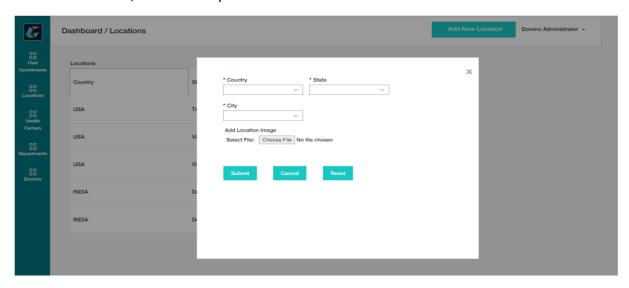

4.1. Users Appointments

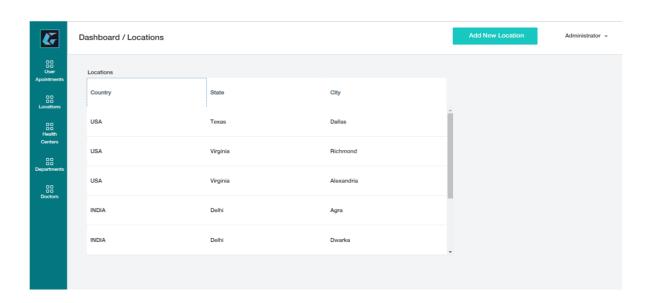

Here admin can see the list of appointments booked or cancelled by the users. Admin can cancel the booked appointments if the selected doctor is not available by selecting the booked appointment record in the table.

4.2. Add Locations

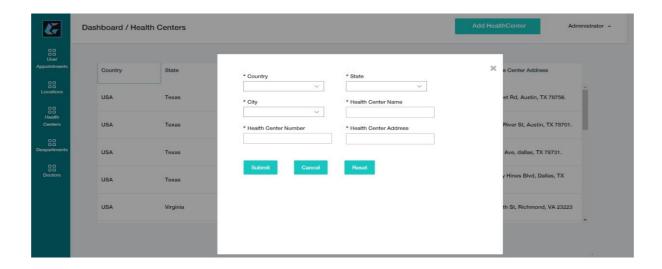

Here admin can add the new locations by clicking the "Add New Location" button. Admin can also see the available locations in the table. After selecting any one of the locations record in the table, admin can update or delete the selected record.

Here admin can add the new doctors by clicking the "Add Doctor" button. Admin can also see the available doctors in the table. After selecting any one of the doctor's record in the table, admin can update or delete the selected record.

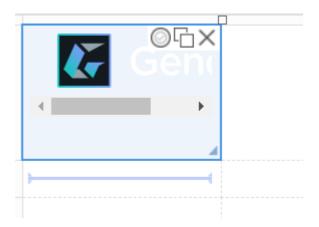

APPLICATION WORKFLOW DIAGRAM

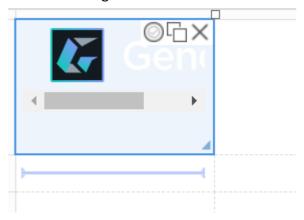

CHANGING THE LOGO

Edit the application and open every page. Follow the steps below to apply the logo of your choice:

• Go to the side-nav section of the page. The highlighted section in the below image.

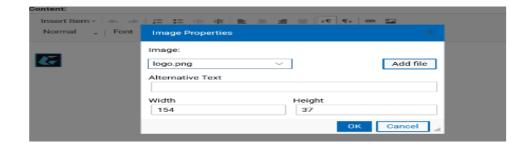

• In the side-nav section, click the first textbox with the default company logo as shown in the below image.

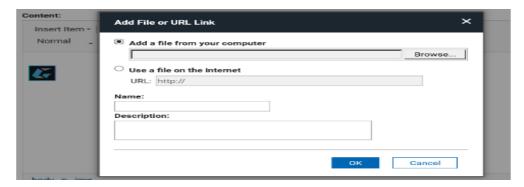

• Upon clicking the text box, a dialogue box will open with the textbox properties as shown below

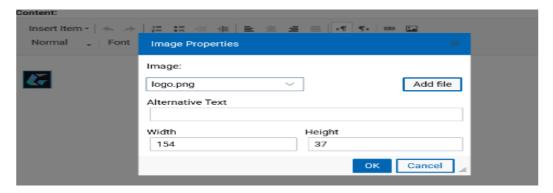

- Remove the existing default logo and add your customized logo in it.
- To add new logo, click on the **image icon** on the top right which contains image properties.

• Select the image from the existing images or add new image from outside the application using the **Add file button.** A dialogue box will be opened as shown below.

- Give the name and description and click on OK. Now the image is added to your volt application.
- Add the logo with the custom width and height as shown below.

• Click on **APPLY** and **OK** to apply the changes made and to set the new logo.

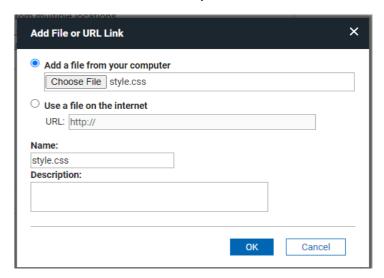

MODIFYING CSS

You can add your custom stylesheets using the instructions given here https://help.hcltechsw.com/domino_volt/1.0/ex_css_toc.html

The CSS used in this application is named 'main.css' and it can be further modified as needed.

Go to Settings>>Files and click on "Add" button and add your custom cascading style sheet file as shown below.

Click on "Choose file" select your custom CSS file and click on "OK".
