APPLICATION SETUP

1. Import Application

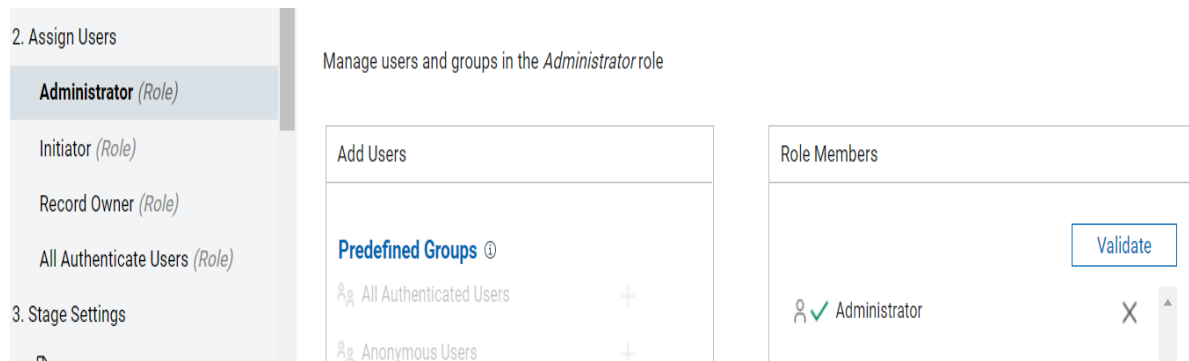

Import the application in your environment and uncheck the “Remove previously defined users and groups from this application” option to maintain the assigned roles.

Application Roles:

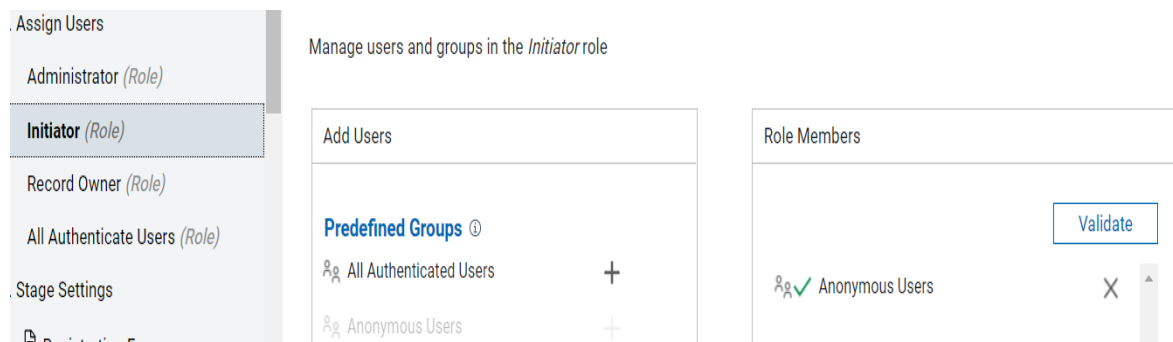

- User (Anonymous User)
- Administrator (Any Authenticated Domino User)

Here Domino Authenticated users must be added in Administrator role.

Here Anonymous users must be added in Initiator role.

Create All Authenticated user role and add all authenticate users in that role.

The screenshot shows a user management interface. On the left, a sidebar lists roles: Administrator (Role), Initiator (Role), Record Owner (Role), All Authenticate Users (Role) (highlighted), and 3. Stage Settings. Below the sidebar is a 'Registration Form' icon. The main area is titled 'Manage users and groups in the All Authenticate Users role'. It contains two panels: 'Add Users' and 'Role Members'. The 'Add Users' panel shows 'Predefined Groups' with 'All Authenticated Users' and 'Anonymous Users', each with a plus sign. The 'Role Members' panel shows 'All Authenticated Users' with a checkmark, a close button (X), and a 'Validate' button.

APPLICATION DESIGN

1. User Registration Page

1.1 Registration Page

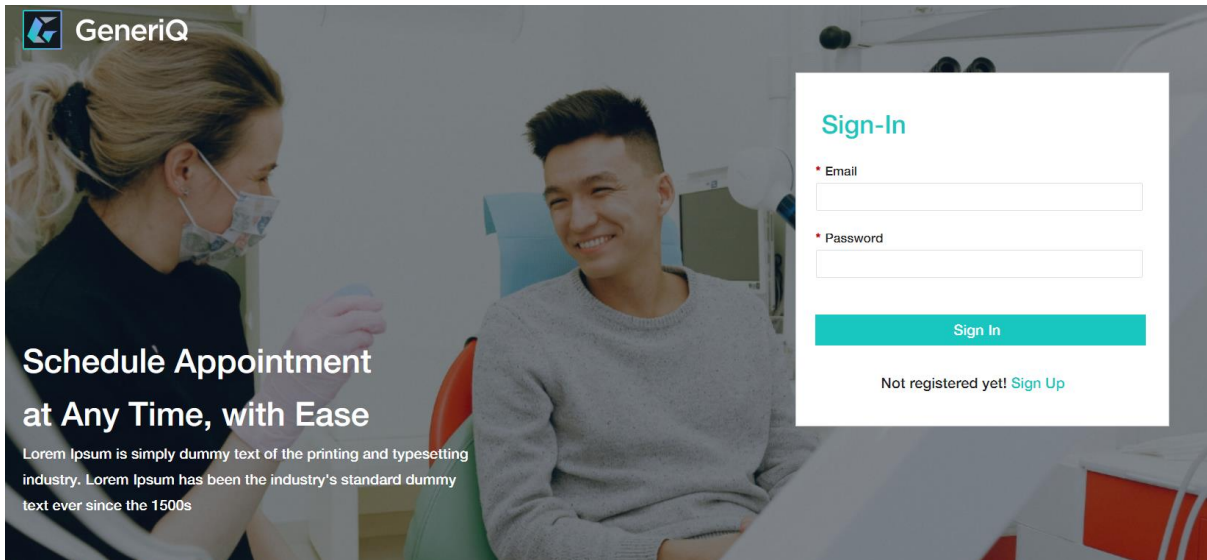

Here user first needs to register to book the doctor appointment.

The screenshot shows a 'Sign-Up Now!' registration form overlaid on a background image of a doctor and a patient. The form includes the following fields: First Name, Last Name, Email, Phone Number, Password, Re-type Password, Country, State, and City. A 'Sign Up' button is at the bottom, and a link for 'Registered already? Sign In' is below it. The background image features the GeneriQ logo and the text 'Schedule Appointment at Any Time, with Ease' followed by a paragraph of Lorem Ipsum text.

2. User Login Page

2.1. Login Page

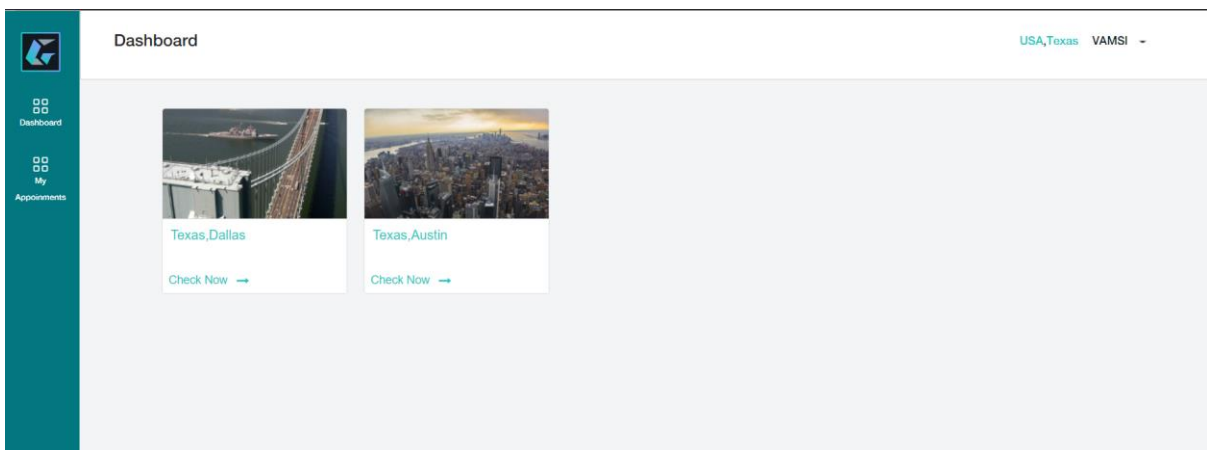

Here already registered users will use this page to login into the application to book the appointment.

3. User Landing Page

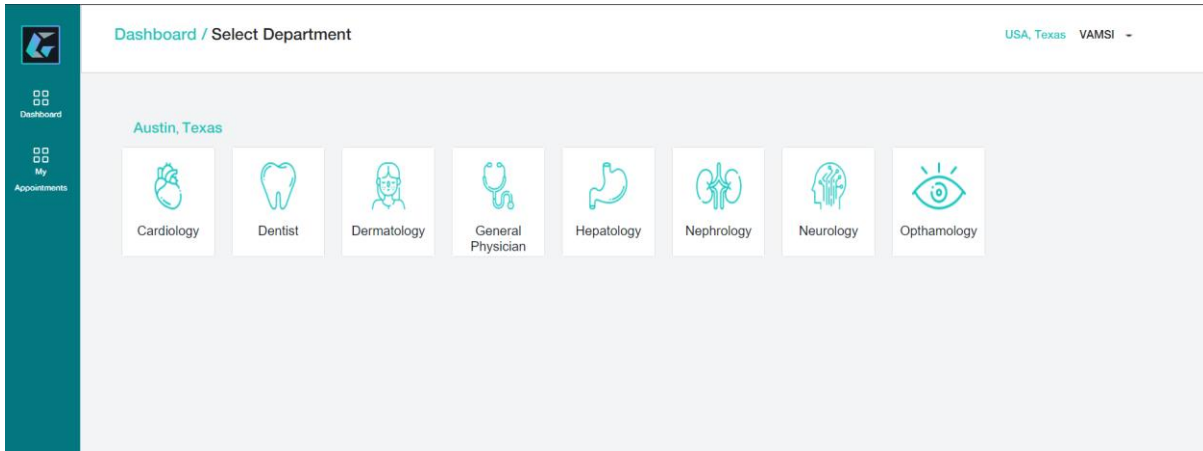

3.1. Dashboard

Here user can see the list of available locations based on his/her registration details. User can select any one of the available locations.

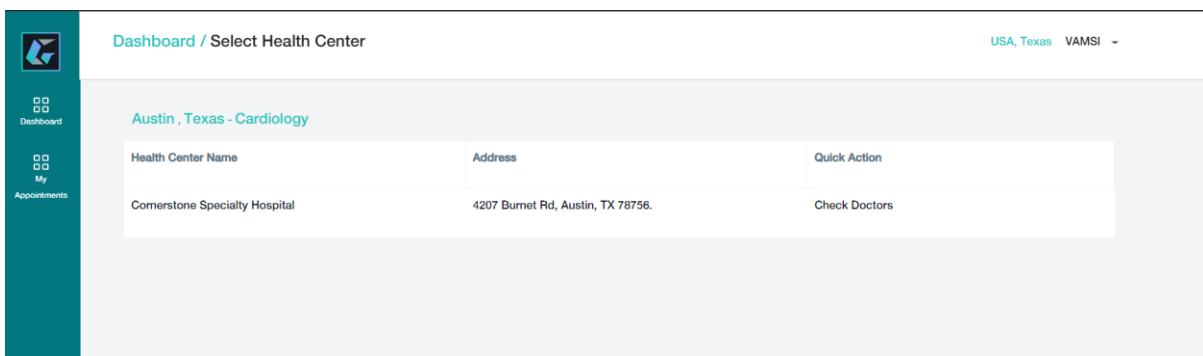

3.2. Departments

After selecting any one of the locations, user can select any one of the available departments.

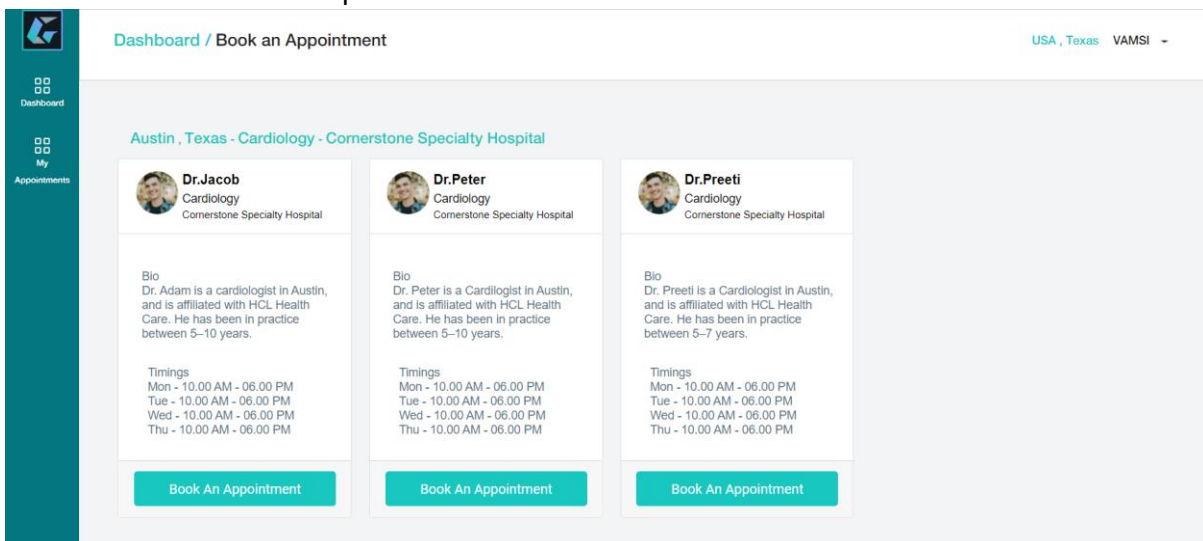

3.3. Health Centers

After selecting any one of the departments, user can select any one of the available health centers.

3.4. Doctors

After selecting any one of the health centers, user can select any one of the available doctors in the selected department.

3.5. Appointment Page

After selecting any one of the doctors, user will redirect to this appointment page, here user can book the appointment after selecting the date and the available time slot.

APPLICATION WORKFLOW DIAGRAM

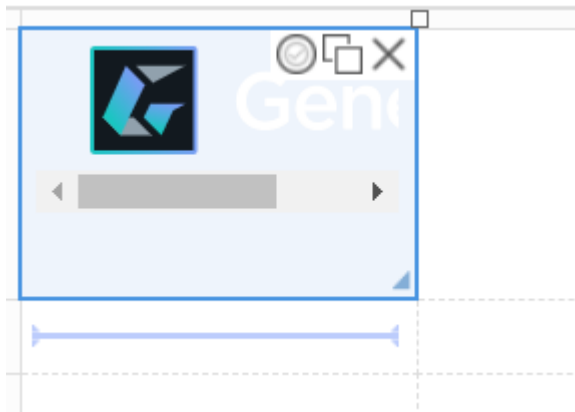

CHANGING THE LOGO

Edit the application and open every page. Follow the steps below to apply the logo of your choice:

- Go to the side-nav section of the page. The highlighted section in the below image.

- In the side-nav section, click the first textbox with the default company logo as shown in the below image.

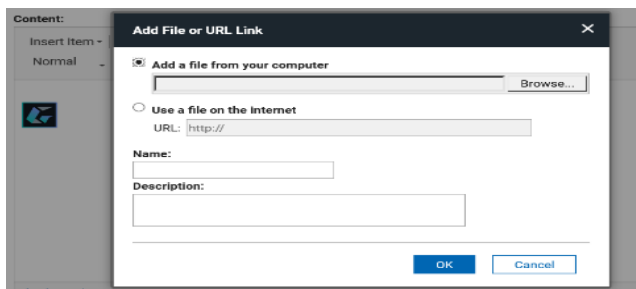

- Upon clicking the text box, a dialogue box will open with the textbox properties as shown below

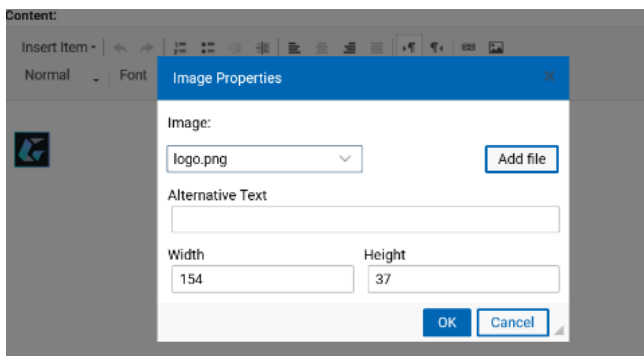

- Remove the existing default logo and add your customized logo in it.
- To add new logo, click on the **image icon** on the top right which contains image properties.

- Select the image from the existing images or add new image from outside the application using the **Add file button**. A dialogue box will be opened as shown below.

- Give the name and description and click on **OK**. Now the image is added to your volt application.
- Add the logo with the custom width and height as shown below.

- Click on **APPLY** and **OK** to apply the changes made and to set the new logo

MODIFYING CSS

You can add your custom stylesheets using the instructions given here

https://help.hcltechsw.com/domino_volt/1.0/ex_css_toc.html

The CSS used in this application is named 'style.css' and it can be further modified as needed.

Go to Settings>>Files and click on "Add" button and add your custom cascading style sheet file as shown below.

Click on "Choose file" select your custom CSS file and click on "OK".

Add File or URL Link

Add a file from your computer

Choose File style.css

Use a file on the internet

URL: http://

Name: style.css
